

FINAL PRECISION: CLINICAL STRATEGIES FOR EFFECTIVE ORTHODONTIC FINISHING AND DETAILING

DR. DAVIDE MIRABELLA

 Warsaw 18.10.2025

AO AMERICAN
ORTHODONTICS

Lecturer

Dr. Davide Mirabella

- Dental Degree (DDS) 1989 University of Catania.
- Certificate in Orthodontics 1993 University of Washington (Seattle, Wa).
- Master of Science in Dentistry 1993 University of Washington (Seattle, Wa).
- From 1993 practice limited to orthodontics in Catania and Verona.
- Adjunct Professor 2003 Dept of Orthodontics University of Ferrara.
- President 2015 Italian Academy of Orthodontics.
- Speaker at national and international orthodontic meetings.
- Author of publications in national and international orthodontic journals.
- 1-year Postdoctoral Program in Lingual Orthodontics 1995 University of Cagliari.
- Specialist in Orthodontics (Italian Degree) 2000 University of Cagliari.
- Active Member of SIDO, International Member of AAO and Founder Member of SIAD (Italian Straight Wire Society) and Accademia Italiana di Ortodonzia.
- Former Active Member Angle Society of Europe.

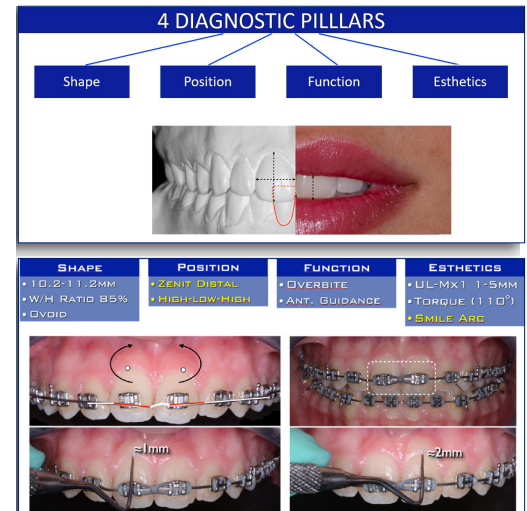

Orthodontic **finishing is probably the most difficult** stage of treatment. It has been advocated that with preadjusted appliances a good clinical outcomes is reached when proper bracket placement is achieved and when the “average” information carried by the selected appliances allows for good tooth position. **Guidelines** on how to reach a good finishing will be presented, and **clinical protocols** will be suggested to help the orthodontist during the final stage of treatment.

This 1-day course will describe:

1. The occlusal and esthetic factors to be evaluated during finishing;
2. How the Straight Wire treatment philosophy helps the orthodontist during the finishing stage;
3. The clinical strategy on how to reach a satisfactory functional and esthetic orthodontic outcome both in conventional and interdisciplinary cases.

Program

- Finishing objectives: idealistic e realistic
- Pre-finishing records
- Check-list of clinical parameters and their interpretation
- Reproducible clinical strategies to achieve:
 - Anterior and posterior alignment
 - Alignments of marginal ridges
 - Occlusal relationships
 - Torque / Tip in the posterior areas
 - Torque/ Tip in the anterior areas
- Overbite and Overjet
- Tooth Size Proportion (Bolton Index)
- Lateral (Canine) and anterior guidances
- Gingival Levels
- Anterior Display
- Finishing of interdisciplinary and/or complex cases

DATE

18 OCTOBER 2025

AGENDA

09:00 - 09:30 REGISTRATION

09:30 - 11:00 LECTURE

11:00 - 11:30 COFFEE BREAK

11:30 - 13:00 LECTURE

13:00 - 14:00 LUNCH

14:00 - 16:30 LECTURE

16:30 - 17:00 DISCUSSION

PLACE

Crowne Plaza the HUB Warsaw

rondo Ignacego Daszyńskiego 2

02-843 Warszawa

PRICE

850 PLN
